

## Physics 427 – Introduction to Computational Physics

James B. Mertens

Homework 11 – due April 26, 2021

---

This homework is intended to be less work than normal in order to provide you with time to work on the final project. It will be weighted as half a homework in the gradebook.

**Problem 1:** The Jupyter notebook assignment contains problems discussed in class, with some additional context. Complete the “Drunkard’s walk” problem at the end of this notebook.

**Problem 2:** Provide a corrected solution to problem 1 on homework 10. The solution to this problem should be available on Canvas; the aim of this problem is just for understanding and review.

**Problem 3:** Work on your final project.
